

# Waterproofing Mat

*Glass-fibre reinforcing mesh for protective and waterproofing liquid resins*

**Waterproofing mat** is a glass-fibre reinforcing mesh. It is embedded in protective and waterproofing liquid resins. It can be used locally to reinforce areas of special attention or globally in elastic waterproofing or epoxy systems. It is available in two versions, 100 gr/m<sup>2</sup> and 225 gr/m<sup>2</sup>.

## ***Application Instructions***

For information as to how to apply the mesh, consult the relevant technical data sheets of the materials that are to be reinforced.

IMPORTERS/ DISTRIBUTORS:

## Technical Characteristics

PROPERTIES	VALUES *
Product	Waterproofing Mat
Material	Glass fiber chopped mat
Colour	White
Weight (gr/m <sup>2</sup> )	100 gr/m <sup>2</sup>   225 gr/m <sup>2</sup>
Modulus of elasticity (GPa)	71

\* All values subject to 5-10% tolerance

### Storage

Store in cool, dry place.

### Packaging

100 gr/m<sup>2</sup>, Roll 1 m x 200 m  
225 gr/m<sup>2</sup>, Roll 1 m x 100 m
