1 Utilization

Manufactured by GRUPPO STAMPLAST, these gratings are a modern solution for covering channels in zones where light and mid weight vehicle traffic is present. Replacing cast iron grids, showing the same strength and load bearing capacity, the grids are lighter, easier to handle and have more resistance to weather exposure, and can be simply fixed on Stamplast NOR and TOP type of channels.

Materials

Composite reinforced polyamide

2 Models

COD.	MOD.*					
GC13X50-02	Plastic grating B125		1	--	--	0,800 kg/pz
GC13X50-04	Plastic grating C250		1	--	--	1,240 kg/pz

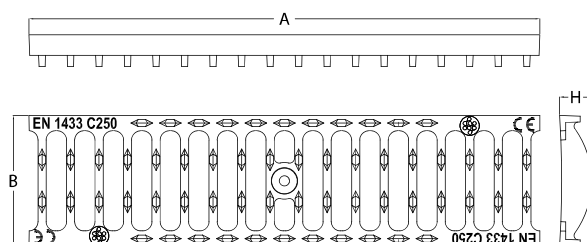

*MEASURES IN CENTIMETERS

3 Technical features

MOD.*	A*	B*	H*	Load class	Breaking load
Plastic Grating B125	49,8	12,6	2,0	B125	--
Plastic Grating C250	49,8	12,6	4,6	C250	--

*MEASURES IN CENTIMETERS **ONLY FOR 12/10 THICKNESS
