

# Concrete Joint Profiles

*For concrete and screed floors*

## Description

Concrete Joint Profiles are used in concrete and screeds. They are easily placed prior to the application of the fresh screed in order to induce a controlled cracking and divide the floor into bays according to the specifier's requirements.

## Technical Characteristics

Product	DELTA 4	DELTA 8
Properties		
Material	UPVC	
Height (mm)	40	80
Width of base (mm)	30	30
Length (m)	4	4
Density (kg/m)	0.195
